Technical Skills

Languages: Python, C++, Dart, Go, SQL
Technologies: PostgreSQL, MongoDB, Firebase Firestore, MySql, Flutter, Firebase, Git/GitHub, REST APIs
Familier: WebRTC, WebScoket, Docker, FastAPI

Education

VIT Bhopal University - 7.5 GPA **Sep. 2021 – May 2025**
B. Tech.,Computer Science Engineering *Bhopal, MP*
Relevant Coursework: DSA, Algorithms, OS, Computer Networks, etc.

Experience

Plana World **Sep 2023 – Apr 2024**
Technical And Marketing Intern *Remote*

- Revamped codebase by integrating theme colors in place of hard-coded colors, ensuring uniformity across 50+ screens, which boosted user satisfaction by 20% and improved overall app aesthetics.
- Enhanced layout for both user and vendor apps across various devices, improving user experience ratings by 15%.
- Developed a video selector, editor, and compressor reducing video size up to 40% less.
- Fixed crashes tracked by Firebase Crashlytics, leading to a 25% reduction in app crash rate.

Shortsqueeze **Dec 2022 – Apr 2023**
Software Development Engineer *Remote*

- Assisted in developing the front end of 3 mobile applications using Dart and the Flutter framework. Inspire Manak - Managed 30+ screens, achieving 100k+ downloads and a 4.2 rating on the Play Store. Racing Line - Created 20+ screens and is unreleased. Podium Pay - Designed 10+ screens with animations, pending release.
- Worked on a PDF generating feature in the Inspire Manak App, facilitating document generation for 50k+ users.
- Engineered 40+ interactive and responsive screens featuring seamless animations, leading to a 30% increase in user interaction and a 20% boost in session duration.
- Implemented AES encryption for secure OTP transactions, increasing security by about 25%.
- Achieved Security Audit certification for the Inspire Manak App by implementing rigorous security protocols; enhanced app security resulting in a 40% reduction in vulnerability threats and improved user trust.

Projects

Paysa | *Flutter, Firebase, Gemini-2-API* **Jan 2024 - Mar 2024**

- Developed a mobile application alternative to Splitwise, enabling unlimited expense splits and personal expense tracking, with over 100 users tracking their bills.
- Integrated Gemini API for contextual chatting, enhancing money management features, resulting in a 20% increase in user engagement.
- Implemented Firebase Authentication, Firestore, and Storage bucket services, improving app reliability and reducing backend maintenance time by 15%.

InShop | *Flutter, Rapid API* **Oct 2022 - Nov 2022**

- Created an Android application to consolidate product details.
- Utilized the Shopping API from RapidAPI, providing users with comprehensive product information from over 50 different websites.
- Conducted extensive testing, fixing 40+ bugs, optimizing performance by 25%, and significantly improving user experience.

Leadership / Extracurricular

Technical Lead of Android Club **May 2023 - May 2024**

- Managed 2+ events, leading the technical team in preparing assignments for contestants.
- Led the judging team in evaluating technical tasks submitted by participants.
- Conducted 3 online sessions on Flutter/Dart through Android Club's YouTube channel with 50+ viewers.
